**Subject: Application for Final Year Internship in Web Development**

Dear Hiring Manager,

As a fifth-year computer engineering student at ESPRIT (Private Higher School of Engineering and Technology), I am seeking a six-month final year internship in web development. Having closely followed your company and being impressed by its commitment to innovation and quality, I am convinced that joining your team would be an enriching opportunity for my professional growth.

My academic background has equipped me with strong skills in programming, software design, and web development. Specifically, I have a solid understanding of programming languages such as Java, JavaScript, React, and NodeJS, as well as associated frameworks and technologies like Angular, Spring Boot, and .NET. I also have practical experience in developing web and mobile applications, and in creating user-friendly and responsive interfaces.

I am particularly interested in Full Stack Development, driven by my passion for creating comprehensive, functional applications from initial design to implementation, performance optimization, and seamless database integration. I enjoy tackling technical challenges and solving problems, which motivates me to stay updated with the latest industry trends and technologies.

By joining your team, I am eager to apply my knowledge and skills while continuously learning and contributing to the success of your projects. I believe my enthusiasm, motivation, and commitment to excellence can add significant value to your company.

Thank you for considering my application. I am available for an interview to discuss my qualifications further.

Sincerely,

*Amel Achour*
